BRIEF SUMMARY

Junior Full Stack Developer with hands-on experience building, maintaining, and scaling production-grade web applications, with a strong focus on Next.js. Currently working at a product-based company, contributing to and leading feature development across multiple client platforms for a European business. Experienced in full-stack development, cloud deployments, performance optimization, and modern state management, with a strong emphasis on shipping new features while maintaining system stability and scalability.

TECHNICAL SKILLS

Frontend: Next.js, React.js, Tailwind CSS, Zustand, SSR/ISR, SEO Optimization

Backend: Node.js, Express.js, REST APIs

Databases: Supabase (PostgreSQL), MySQL, MongoDB

Languages: JavaScript (ES6+), TypeScript, Python, C++

Cloud & DevOps: Vercel (Serverless), DigitalOcean, Hetzner

AI Tools: GitHub Copilot, Claude, GPT-based tools

Tools: Git, GitHub, Postman, Firebase, Figma

EDUCATION

B.Tech - Computer Science, *Parul University, Gujarat*
CGPA – 8.9/10

Dec 2021 – Jun 2025

EXPERIENCE

Junior Full Stack Developer

Jun 2025 – Present

EnactOn Technologies Pvt. Ltd., Surat, India (Remote)

- Owned end-to-end feature development across multiple production applications using **Next.js and React**.
- Optimized and scaled a restaurant management ecosystem including admin dashboards, restaurant websites, food ordering platform, shared UI components, and an SSO-based wallet frontend.
- Improved application performance and SEO by **30–40%** through SSR/ISR, optimized data fetching, pagination, and component refactoring.
- Integrated **Stripe payments and payouts** for restaurants, and deployed applications on **Vercel, Supabase and DigitalOcean** ensuring scalability and reliability.

Full Stack Developer – Intern

Dec 2024 – May 2025

EnactOn Technologies Pvt. Ltd., Surat, India

- Focused on performance optimizations, refactoring legacy code, and improving SEO and data access patterns.
- Introduced pagination and query optimizations, reducing unnecessary data load by **40%+**.
- Built strong foundations in scalable architectures, databases, and collaborative development workflows.

PROJECTS

Restaurant Management & Food Ordering Platform (Production)

- Large-scale SaaS platform supporting restaurant onboarding, operations, restaurant websites, food ordering, reusable widgets, and SSO-based access.

- Built using **Next.js**, **React.js**, **Node.js**, with SEO improvements via SSR/ISR and optimized rendering.
- Integrated **Stripe payments and payouts** for restaurants and focused on long-term performance and maintainability.

Affiliate & Rewards Platform (Production)

- User-facing platform built entirely using **Next.js**, owned end-to-end and delivered for **two clients**.
- Enables users to sign up, generate affiliate links, manage postbacks, track rewards, and view earnings via reports and graphs.
- Implemented secure authentication, transaction tracking, and payout visibility with a focus on scalability and clean architecture.

ACHIEVEMENTS

- Secured **Top 5%** rank in NPTEL Online Course of Software Engineering through IIT Kharagpur.
- Secured a Rank of **1315** out of 15000+ participants in Codechef's Staters 45.
- Certified in C++ Programming by CISCO Networking Academy.

EXTRA-CURRICULAR ACTIVITIES

- Technical Co-Lead at Explorer Club, a cultural club at Parul Institute of Technology.
- Student Innovation Ambassador at Parul Innovation and Entrepreneurship Research Centre.
